About Main Line Timber

Here at Main Line Timber Ltd, we specialise in the supply of Fencing Panels, Standard and Bespoke Gates, Decking, Concrete Products, Sleepers, and Garden Trellis and Arches.

Main Line Timber Ltd was founded in 1991, by Edward Gascoigne at Old Station Yard, Woodford Halse, Northamptonshire. Edward started out with one log cutter and would travel all over delivering logs before diversifying and expanding into timber products.

As word spread of the great quality products and exceptional service, naturally the company grew. This led to the opening of another branch in 2011 at the Old Garage, Marton, Warwickshire. This was followed by the most recent opening of our third depot in 2025, at Park Farm, Warwick, Warwickshire.

We also pride ourselves on the high quality timber and garden products, that we supply at competitive prices. Due to the right pricing and quality of products, we have been able to evolve the business over the years, so that both the product range and services have considerably increased.

All products can be delivered to your home, with excellent levels of customer service by our

dedicated team. Our reputation has been established through our family run business, where each person is regarded as more than just a customer.

Today, the next generation are coming through, with Edward's children, Rachel and Emily supporting the business in both sales, accounts and marketing respectively.

We supply to many areas including Banbury, Rugby, Northampton, Coventry, Daventry, Milton Keynes, Stratford-Upon-Avon, Warwick and surrounding areas.

At our Woodford branch, we manufacture all gates, both standard stock and bespoke sizing. The quality of the raw materials and workmanship that go into making all of our gates have gained a brilliant reputation within the local area and beyond.

Contents

- Pedestrian Gates 3-4
- Driveway Gates 5-8
- Field Gates 9-10
- Panels 11-12
- KDM Gates, Panels and Arches 13-18

Gate Treatment and Protection

All of our wooden gates are constructed using a Scandinavian pine and are pressure treated with a Tanalith E treatment. This is a combination of copper and organic biocide ingredients, that has been recognised over the last 30 years for providing the very best protection for timber. The unique and patented technology gives an even wider, more robust and durable protection against wood decay and insect infestation.

Even though we have taken great care in the selection of material for your gate and in its manufacture, like all natural wood products, your gates will be affected by extremes of weather. Periods of hot sun and drying winds can be particularly harmful to your gates.

Therefore, we do recommend that you treat your gates on a regular basis with a wood preservative or an oil/water based treatment and preferably install your gates in the spring/early summer months, where temperatures are less extreme.

We offer made to measure sizes in these gates and all our gates are pressure treated with a Tanalith E Treatment

Byfield Gate
